12v battery assembly outdoor power supply

Overview

Can you use a 12V power supply on a camping trip?

The end product is a simple-to-use 12V and 5V uninterruptible power supply that's great for charging mobile devices should there be a power outage, for example. However, you can also use this versatile device as a hefty power bank and take it on camping trips to power 12V devices.

What is a simple uninterruptible power supply?

This article discusses a simple uninterruptible power supply that can come in handy in various situations. The design contains a rechargeable Li-Ion battery, battery protection and charging circuitry, and a 12V step-up module. It features two 12V outputs and a standard full-size USB port for charging all sorts of mobile devices.

How do I use a 12V battery pack?

You will need to attach the 12V battery pack to the electronic device that you are planning on using it with. You may have to do this manually. If so, ensure that the device is powered to prevent injury. You may want to consider wearing safety gloves to further prevent injury.

How many AA batteries do I Need?

This can come in handy for your next camping trip, or in the event of a power outage. Go to an electronics supply store, or a hardware store, in order to purchase eight 1.5V AA sized batteries. You will need eight because all together they will equal one 12V battery ($1.5 \times 8 = 12$). You also need to purchase a battery pack kit.

How much power can a battery provide?

The battery offers a capacity of 2.2Ah, which should be enough to supply small devices with power for a few hours. However, it's possible to modify the design to use a larger battery when necessary. The finished device has two

switchable 12V outputs and a standard 5V USB socket for charging mobile devices. Bill of Materials Part/Quantity.

How do you test a 12V battery pack?

Place them in the compartment. If the battery pack has a tester light, this should turn on and appear green. This indicates that the battery pack has been properly assembled and is ready to be used. You will need to attach the 12V battery pack to the electronic device that you are planning on using it with. You may have to do this manually.
