# 60mw industrial inverter

## Overview

---

How much does a Sunny Tripower 60 kW inverter weigh?

No other inverter weighing only 75 kg with an output of 60 kW offers this. With its compact design, the Sunny Tripower 60 requires little space, reduces on-site preparation work, simplifies installation and lowers maintenance costs.

What is a GoodWe SMT 50-60 kW inverter?

GoodWe SMT 50-60kW Series inverter is ideal for medium and large-scale commercial installations. Harvest solar energy and generate environmental-friendly power for increased return on investment brought by high yields with your commercial PV system.

What is a 600W inverter?

A 600W inverter is a medium-duty power inverter suitable for powering small and some mid-sized appliances and equipment when you are on travel trips, camping sites, or in remote job sites.

What is the best solar inverter?

With max. 15A DC input current per string, the SMT 50-60kW Series is compatible with different types of high-power modules, which ensures more solar power absorption making it one of the most productive inverters on the market. Up to 6 MPP trackers guarantee optimal energy production even in shade.

What is a SMT 50-60kW solar inverter?

SMT 50-60kW Series is a pioneering inverter for your business and value. 200V-950V wide input operating voltage range allows the solar system to start at an early stage, fully utilizing the daytime to maximizing solar powered energy generation. The fuse-free design without consumable parts significantly reduces the operating time and costs.

## What is Sunny Tripower 60?

The new Sunny Tripower 60 is part of an innovative global system solution for commercial and industrial PV systems. This solution combines the advantages of a decentralized system layout with the benefits of centralized inverter designs in order to get the best of two worlds.
