## Overview

What is a cylindrical lithium ion battery?

Cylindrical lithium-ion battery cells are a type of rechargeable battery commonly used in a wide range of electronic devices, electric vehicles, and energy storage systems. They are characterized by their cylindrical shape, standardized sizes, and high energy density, making them versatile and suitable for various applications.

What is a cylinder type lithium ion secondary battery?

Cylindrical Type Lithium Ion Secondary Batteries are packaged in metal cans. These batteries can be used at high rate and maintain high capacity. If you cannot find the model number, post to the Contact Form.

What are the naming rules for lithium ion batteries?

The naming rules for cylindrical lithium-ion battery cells follows a standardized format based on the cell's dimensions, and usually represented by a five-digit code, where each digit provides specific information about the cell's dimensions. Here's a breakdown of the representation: What does 18650 means?

.

What is a GP Primary lithium coin battery?

Cameras (conventional/digital/instant) GP Primary Lithium Coin Batteries supply power with high energy density and reliability that works for a variety of applications. Despite their small size, these lithium coin batteries possess high energy density. They are especially suitable for compact devices with extra low background drains.

How do you identify a cylindrical lithium-ion battery?

For instance, "65" represents a height of 65mm. Fifth Digit: The fifth digit

indicates the cylindrical shape of the cell. Typically, it's "0" for cylindrical cells. By following this naming convention, we can easily identify the size and shape of cylindrical lithium-ion battery cells.

Can you use lithium ion batteries with electronic cigarettes?

In addition, Murata requests that customers refrain from disassembling and removing lithium-ion batteries equipped in end products (finished products) or combining individual lithium-ion batteries with electronic cigarettes and various other devices as doing so is extremely dangerous in either case.
