supplies for sale in South
America**

Overview

Are there electrical outlets in South America?

We get asked ALL THE TIME about Electrical Outlets in South America. Electrical Outlets in South America can be very tricky. They vary depending on the country you are travel to. It is always a good idea to bring along a universal charging adapter either way. With one of these charging adapters, no matter if 120v or 240v, you are covered.

Do you need a power adapter in South America?

The U.S. is compatible with a Type A/B plug, which you'll find quite a bit of in South America. However, in other places listed above that diversify from this, you'll need a reliable adapter. One of the best investments you can make in your future travels is this universal power adapter.

What type of electricity does South America use?

Here's a guide to electricity in South America by country: May use one of two types, the typical European rounded two prong plug or a 3 prong plug used in Australia (see image above). Uses the same outlet as the United States. The only country that uses dual voltage. Depending on the region, voltage might be 115 V, 127 V, or 220 V.

Are there different plug types in South America?

But, as it turned out, for South America it's not so easy. Many of the countries have different electrical outlet plugs and different voltages, so it's not really a one-plug-fits-all job! The following guide breaks down the different plug types used in each South American country to help you plan your trip.

Which output plug to use in South America?

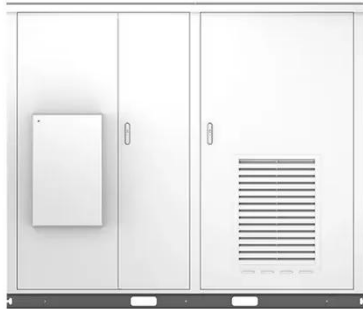

So, it should be that the only thing you need to worry about when travelling South America is which output plug to use where. Here's a list of all the plug types by country: Argentina – Voltage 220V, Frequency 50Hz May use either

the standard European rounded two-prong plug (Type C), or the 3 prong plug used in Australia (Type I).

Which outlet should I use in South America?

South America as the region has not been able to agree on a common outlet to use and it varies from country to country. If you're visiting several countries you need to investigate each one. Some use the typical American two and three prong plug but many use the outlet that is commonly found in central Europe.
