**Are there any recommendations
for a new outdoor power supply
in Warsaw**

Overview

Why do we need energy storage facilities in Warsaw?

In summary, the construction of energy storage facilities in Warsaw is a significant step towards enhancing the city's energy infrastructure, supporting the integration of RES, and ensuring a stable and secure power supply for its residents. This article was prepared by Institute of Fluid-Flow Machinery Polish Academy of Sciences.

Will Warsaw benefit from the construction of ten electricity storage facilities?

Warsaw is going to benefit from the construction of ten electricity storage facilities, thanks to a funding boost of over PLN 12 million from the National Fund for Environmental Protection and Water Management (NFOŚiGW).

Will Poland have a new energy strategy?

A new Polish energy strategy is expected by the end of 2018. Some particularly interesting statements in the public debate on this strategy are the announcement by Energy Minister, Krzysztof Tchorzewski, in September 2017, that the Ostrołęka coal-fired power plant would be the last big coal investment in Poland.

What is Poland's power sector?

Poland's power sector is dominated by hard coal and lignite, which in 2015 accounted for 83.7 per cent of total electricity production. Between 2020 and 2035, about 60 power plants constructed in the 1970s are expected to retire. This accounts for more than 50 per cent of Poland's installed capacity.

2.

Why do we need a new power plant in Poland?

Poland needs low- and zero-carbon new capacity, capable of flexible operation in a RES-based system. We need units that will support sector coupling, i.e. the combination of the power generation and heat sectors, the development

of electromobility or the electrification of industry.

Is Poland still a power plant?

Version 2.0 Study commissioned by Agora Energie- wende. Poland stands at the crossroads of important deci-sions on its energy system. At this juncture, the Pol-ish power mix is still dominated by hard coal and lignite. However, between 2020 and 2035, about 60 power plants constructed in the 1970s are expected to retire.
