# Austria if outdoor power supply

## Overview

---

What if power plant feed-ins and electricity imports are not covered in Austria?

If consumption in Austria can no longer be fully covered by power plant feed-ins and electricity imports, the provisions of the Energy Intervention Powers Act (Energienkennungsgesetz) apply.

What percentage of gas-fired power plants are available in Austria?

The availability of gas-fired power plants in Austria is 66% this week. The production of electricity from gas does not only serve load coverage but is also particularly relevant for stabilizing the grid. According to grid operation planning, the percentage of availability of cross-border lines is approx. 92%.

Who is Austrian power grid AG?

Austrian Power Grid AG (APG) employs over 900 specialists who work together in interdisciplinary teams. Our specialists' top professional qualifications and high level of personal dedication help to guarantee a secure and uninterrupted supply of electricity around the clock, 365 days a year.

How much control energy is available in Austria and Germany?

In Austria and Germany, between 2,500 and 3,500 MW of control energy is available at any given time. The TSOs purchase this control reserve from producers on the basis of tenders.

Should energy intervention powers be regulated in Austria?

However, such measures would only be necessary in case of an extreme emergency. In Austria, the Energy Intervention Powers Act legitimizes these measures (following the issue of a corresponding regulation on measures by the Federal Ministry) in such a way that they cause the least possible damage and impact on society and the economy.

What makes Austria a good country?

With a grid reliability of over 99.99%, Austria's security of supply is among the best in the world. Key factors for this stability are the good coordination among grid operators at a national and international level, as well as the favorable mix of power plants in Austria.
