Backup UPS uninterruptible power supply in Valparaíso Chile

Overview

What is an uninterruptible power supply (UPS) system?

Uninterruptible Power Supply (UPS) systems ensure reliable power for critical environments such as data centers, hospitals, telecom infrastructure, and industrial operations. These systems protect against data loss, equipment damage, and costly downtime during outages or power disturbances.

What are the benefits of using Wago's uninterruptible power supplies (UPS)?

Key Benefits: In the event of short-term power outages, WAGO's Uninterruptible Power Supplies (UPS) bridge instabilities and keep your system running safely. For longer outages, critical processes can be safely maintained using our UPS solutions to prevent unwanted impacts and data loss.

What is global power supply?

Global Power Supply offers a comprehensive portfolio of Uninterruptible Power Supply (UPS) systems sourced from leading manufacturers to support the most demanding critical power applications. With a wide range of in-stock UPS units and batteries, we provide rapid deployment to ensure your operations stay powered without interruption.

Why do you need an UPS system?

These systems protect against data loss, equipment damage, and costly downtime during outages or power disturbances. We offer both permanent and rental UPS systems—ideal for planned upgrades, repairs, or temporary protection—with indoor and outdoor units designed for minimal or zero disruption to operations.

Will a back-ups revert to power if power goes out?

Yes, when adequate power is restored to the UPS and is within the operating voltage range of the UPS, it will revert o passing utility power to connected electronics. Will this UPS provide continuous power in the case of a power

outage?

This Back-UPS has a typical transfer time of 6ms to 10ms to switch to battery power when the main power goes out.

How long does a back ups take to switch to battery?

This Back-UPS has a typical transfer time of 6ms to 10ms to switch to battery power when the main power goes out. The transfer time is fast enough that most devices will not experience a power drop when the UPS transitions to battery power. Can I plug the UPS to an extension cord or does it have to be plugged in to a wall outlet?
