Baghdad Communication Base Station Inverter Huawei

Overview

What is Huawei base station backhaul microwave?

Based on leading wireless, transmission, and datacom technologies, Huawei base station backhaul microwave solution provides fiber-level broadband wireless backhaul capabilities, ultra-low latency, fully modular architecture design, and co-site integration with wireless networks.

What is a Huawei base station?

Let's dive into a technical explanation. A base station, also known as an eNodeB (for 4G LTE) or gNodeB (for 5G NR) in Huawei's terminology, is a piece of equipment that facilitates wireless communication between user equipment (UE) like smartphones, tablets, and IoT devices, and the core network of the telecommunications provider.

What is dbs3900 dual-mode base station?

DBS3900 Dual-Mode Base Station is the fourth generation base station developed by Huawei. It features a multi-mode modular design and supports three working modes: GSM mode, GSM+UMTS dual mode, and UMTS mode through configuration of different software. In addition, the DBS3900 supports smooth evolution to the Long-Term Evolution (LTE).

What is coordinated delivery of base stations & microwave devices?

Coordinated delivery of base stations and microwave devices supports fast base station deployment and service provisioning. 10 Gbit/s to-site large broadband backhaul, TDM/IP multi-service interfaces, 50 microsecond ultra-low latency, meeting 5G-oriented base station backhaul requirements.

Is Zain launching a 3G phone service in Iraq?

Zain Iraq is to launch its 3G mobile phone services in January. Reuters reports that Zain, along with rivals Asiacell and Korek, eventually agreed to the government's terms and formally signed the contracts at a ceremony in

Baghdad on Monday attended by prime minister Haider al-Abadi. Zain Iraq recently paid the first [.] By John Lee.

How many UMTS carriers can a bbu3900 support?

When the DBS3900 works in UMTS mode, a BBU3900 supports 24 cells, the maximum configuration of 3 x 8, 1,536 CEs in the uplink, 1,536 CEs in the downlink. In addition, the BBU3900 supports the HSDPA and HSUPA. An RRU3806 supports a maximum of four UMTS carriers.
