Bandar Begawan Communications starts building 5g base stations

Overview

How many 5G base stations are there in China?

With 4.19 million 5G base stations already operational across China, the MIIT emphasized that “promoting 5G revolution and 6G innovation will be one of the priorities” for 2025, according to a report by Chinese newspaper China Daily. Chinese main operators are China Mobile, China Telecom and China Unicom.

Who are China's 5G operators?

Chinese main operators are China Mobile, China Telecom and China Unicom. In addition to its expected expansion in the 5G field, China noted that it is also set to begin trials for 10-gigabit optical networks and enhance computing power infrastructure, reflecting the growing demand for artificial intelligence (AI) technologies.

What is the world's first 6G field test network?

In July, China successfully developed what it claimed to be the world’s first 6G field test network that integrates communications with intelligence, demonstrating that 6G-level transmission capabilities can be achieved using existing 4G and 5G platforms, according to the report.
