## Overview

---

### How to fix a faulty base station?

Turn off the base stations, unplug them for a few seconds, and then plug them back in and turn them on again. It breaks the continuous flow of power which might be the reason for the existing issue. Also, try to change the power supply. In some cases, the power supply of the base stations can be faulty.

### What causes a base station to go offline?

Troubleshooting the network connection, ensuring the base station is securely connected to the router, and minimizing signal interference can help resolve the issue. Power Supply Problems: Issues with the power supply, such as a damaged cord or a turned-off power strip, can result in the base station going offline.

### Why is my base station not working?

Make sure your Base Station has the correct Wi-Fi network and password. Look at other devices in your home and check if they're connecting or disconnecting from Wi-Fi. Unplug your router for 30 seconds, then plug it back in to give it a fresh start. If the top LED ring isn't spinning, press the pairing button on the back of your Base Station.

### How do I unplug my Arlo base station?

Follow these steps: 1. Unplug the power adapter from the Arlo Base Station. 2. If connected to a power strip or surge protector, unplug it from there too. 3. Check the power light on the Arlo Base Station. Press and hold the power button until the light turns off if it's still on. 4. Leave the Arlo Base Station unplugged for at least 10 seconds.

### How do I know if my base station is working?

1. Ensure the base station is powered on and connected to a power source. 2. Check if the power light on the base station is solid green. 3. Make sure the

Ethernet cable is securely connected to the base station and your Wi-Fi router or modem. 4. Check the internet connectivity LED on the base station. It should be solid green. 5.

Why is my ring base station not working?

If your Ring Base Station is stuck or not working, try these simple troubleshooting methods: Turn it off and on again by rebooting your Base Station. You can do this by briefly tapping the reset button on the back of your Base Station. Don't hold it down, or it will factory reset it, though! It might be a connectivity issue.
