# Battery cabinets require separation

## Overview

---

Keep charging and storage cabinets physically separated. Use automatic fire suppression systems where possible. Ensure cabinets are placed in ventilated and easily accessible areas. How do you separate Bess-Li cabinets & open battery racks?

The BESS-Li cabinets or open battery racks must be separated from other BESS-Li cabinets or open battery racks by a minimum of 3 feet (1 m) or by partitions extending from floor to ceiling/roof/floor above. The partitions must be constructed of masonry units. The partitions need to extend 6 inches (150 mm) beyond the cabinet or open battery rack.

What are the safety requirements related to batteries & Battery rooms?

Employers must consider exposure to these hazards when developing safe work practices and selecting personal protective equipment (PPE). That is where Article 320, Safety Requirements Related to Batteries and Battery Rooms comes in.

Do battery cabinets need a fire rated partition?

The partitions separating the battery cabinets or open battery racks will help limit the spread of a fire from one battery or battery system to another. The partitions need to be floor to ceiling/roof/floor above. Any penetrations need to be firestopped for an hour rating. The partitions are not going to be a true fire rated partition or fire wall.

Can lithium ion batteries be stored together?

Generally, lithium-ion batteries (in good condition) can be stored together with other lithium-ion batteries, but we highly recommend choosing a Battery Cabinet or Outdoor Battery Store that is equipped for the amount of batteries you are working with.

How should batteries be maintained?

Batteries should be maintained according to the manufacturer's maintenance schedule and IEEE-1188 best practices. Approved devices should be used to measure and trend parameters to avoid a thermal runaway condition.

Do cabinets with VRLA batteries need a sign kit?

In addition, cabinets with VRLA batteries have a separate requirement to identify the details of the battery system, electrical, chemical and fire hazards. Remember New York City B-29 Certificate of Fitness requires a specialized sign kit for all five boroughs.

## Battery cabinets require separation
