## Overview

---

Will a 100 MW solar plant be built in Botswana?

State-owned Botswana Power Corp. has signed a power purchase agreement with a consortium of Chinese enterprises and other companies to construct a 100 MW solar plant in southern Botswana. The project is expected to start generation by the end of 2025.

When will Botswana start generating electricity?

The facility is expected to start generation by the end of 2025. Botswana 's President, Mokgweetsi Masisi, said the project is a key milestone in the country's energy transition. "Our journey toward energy security and transition has begun in earnest and is unstoppable.

How long will Botswana Power Plant last?

The deal involves an engineering, procurement and construction contract, with operation and maintenance of the power plant for 25 years. The facility is expected to start generation by the end of 2025. Botswana 's President, Mokgweetsi Masisi, said the project is a key milestone in the country's energy transition.

Who is sinotswana green energy?

The agreement is in place between Botswana Power and Sinotswana Green Energy, a consortium of Chinese and Botswana companies, jointly established by China Habor Engineering Co., China International Water and Electric Corp., and New Energy Company Proprietary Ltd., a local company. A tender for the project took place last year.

What is Botswana's Integrated Resource Plan?

Botswana's Integrated Resource Plan seeks to secure 200 MW from renewable energy sources by 2030. The country has also set a target of integrating 50% renewable energy into the national energy mix by 2036. According to figures

from the International Renewable Energy Agency (IRENA), Botswana had 6 MW of deployed solar at the end of 2023.

How many villages in Botswana have been electrified?

This project marks another significant milestone in our national development commitments,” Masisi said, adding that to date, 460 out of 565 villages in Botswana have been electrified, equating to 81% of rural electrification. Botswana's Integrated Resource Plan seeks to secure 200 MW from renewable energy sources by 2030.
