Chad Uninterruptible Power Supply Quote

Overview

What is the global uninterrupted power supply (UPS) market size?

The global uninterrupted power supply (UPS) market is expected to grow at a CAGR of 5.5% from 2018 to 2030. The growth in the UPS market can be attributed to the increasing demand for UPS systems from various end-use industries, such as telecommunication, financial services, government procurement, manufacturing and transportation.

What is an uninterrupted power supply (UPS)?

An uninterrupted power supply (UPS) is a device that maintains a continuous flow of electric power to connected equipment in the event of a power outage or fault. The UPS system will typically provide enough time for the equipment to gracefully shut down, preventing data loss and minimizing system downtime.

What is offline/standby uninterrupted power supply (UPS)?

Offline/standby Uninterrupted Power Supply (UPS) was the largest segment in terms of revenue share in 2017 and is expected to maintain its dominance during the forecast period. This segment is mainly used by small businesses and households for backup power during outages or emergencies.

Who is global power supply?
