Will Sungrow supply a 480 MW PV plant in Chile?

SANTIAGO, Chile, May 24, 2022 /PRNewswire/ -- Sungrow, the global leading inverter solution supplier for renewables, announced that it will supply its turnkey PV inverter solutions solutions to a 480 MW PV plant in Chile's Atacama Desert.

How does solar power work in Diego de Almagro sur?

Since 2022, the plant Diego de Almagro Sur operated by the electric utility company Colbún S.A. has been supplying the region with solar power using SMA technology. This is now followed by a 228 MW battery storage system with a capacity of 918 MWh and a four-hour charging and discharging time.

Does the Atacama Desert have a solar storage system?

The storage system in the Atacama Desert complements an existing 220 MW PV plant and includes black-start capability. Since 2022, the plant Diego de Almagro Sur operated by the electric utility company Colbún S.A. has been supplying the region with solar power using SMA technology.

Why should you choose Sungrow sg6250hv-mv inverter solution?

As a result of the optimal IP65 high protection capability, Sungrow's SG6250HV-MV inverter solution is resilient to sandy and dry conditions. The 6.25MW solution also equips the anti-PID (Potential Induced Degradation) function, which can recover power degradation in the PV modules, enabling a maximum yield and longer lifetime for modules.
