Will 5G Revolution & 6G innovation be a priority next year?

The move comes as the country charted its vision for industrial growth during a two-day work conference of the Ministry of Industry and Information Technology. With 4.19 million 5G base stations already in operation, the industry regulator said that "promoting 5G revolution and 6G innovation will be one of the priorities" next year.

How many 5G users are there in China?

The number of 5G mobile users in China hit 475 million by the end of July, according to data from the ministry. China has built the world's largest 5G network. By the end of 2021, the number of 5G base stations in the country accounted for over 60 percent of the global total, according to a report from the National Bureau of Statistics.

Will China build a 5G network in 2021?

"By the end of the 14th Five-Year Plan period (2021-25), China will have built the world's largest and most extensive stand-alone 5G network and basically achieve full network coverage in urban and rural areas," Wang said. Ding Yun, president of Huawei Technologies Co's carrier business group, said: "5G is no

longer for early adopters.

How 5G technology is transforming China's economy?

According to MIIT data, 5G technologies have been integrated into 71 major economic categories in China. Zhao Zhiguo, the ministry's chief engineer, said the ministry will continue to promote the digital transformation of industries and carry out the AI Plus initiative to speed up new industrialization empowered by digital technologies.
