What is a 5G base station?

A 5G network base-station connects other wireless devices to a central hub. A look at 5G base-station architecture includes various equipment, such as a 5G base station power amplifier, which converts signals from RF antennas to BUU cabinets (baseband unit in wireless stations).

How many 5G base stations does China have?

In November, China claimed that, despite the COVID-19 pandemic, it had built over 700,000 5G base stations in 2020, adding to the 100,000 base stations built in 2019. This means that China as a single country has more base stations than the combined total of every other nation on earth.
