Compact power station factory in Cambodia

Overview

Why did Cambodia add a 200 MW power station in Phnom Penh?

One of the ways Cambodia's national utility, Electricité du Cambodge (EDC), sought to increase flexibility was by adding a 200-MW power station in Phnom Penh, the nation's capital. In August 2019, MAN Energy Solutions and China National Heavy Machinery Corp. (CHMC) were jointly awarded a contract to build the facility.

What happened to Cambodia's first coal-fired power plant?

The 100 MW power station was commissioned in 2014. It was Cambodia's first coal-fired power plant. Starting when it was first proposed in 2008, the plant faced strong opposition from local residents over its environmental and health effects. In February 2010, a financing agreement for units 1 and 2 was closed.

How much money does Cambodia need to build a power plant?

The Cambodian government has stated in its PDP that it will need \$9 billion of investment to develop new power plants and expand the national grid, of which \$2.5 billion has been approved between 2022 and 2025. Opportunities exist for power generation and transmission equipment.

Why do Cambodians need diesel generators?

There is tremendous demand in Cambodia for diesel generators as backup power, on-site power plants, and power generation in rural areas not served by public utilities.

What are the main sources of electricity in Cambodia?

Major sources of local power generation are hydro and coal, and minor sources include diesel, wood, and biomass. In addition to local power generation, Cambodia also buys electricity from neighboring countries, especially during the dry season.

How many MW is Sihanoukville cel power station?

Sihanoukville CEL power station is an operating power station of at least 250-megawatts (MW) in Sihanoukville, Cambodia. It is also known as CEL 1 power station (Unit 1, Unit 2), CEL 2 power station (Unit 3). Loading map. Unit-level coordinates (WGS 84): Unit 1, Unit 2, Unit 3: 10.740213, 103.580827
Project-level coal details
