# Compact power station factory in Sri-Lanka

## Overview

---

How many power plants are in Sri Lanka?

Sri Lanka has 47 utility-scale power plants in operation, with a total capacity of 3717.1 MW. This data is a derivative set of data gathered by source mentioned below. Global Energy Observatory/Google/KTH Royal Institute of Technology in Stockholm/Enipedia/World Resources Institute/database.earth.

Why did Sri Lanka build a 165 MW combined cycle power plant?

In order to meet the ever-growing power demand as a result of the rapid socio-economic development of the country, the Sri Lanka Government decided to build a 165 MW Combined Cycle Power plant on the vacant land adjoining the existing Kelanitissa Power Station in year 2000.

Why is Sri Lanka a good place for hydropower generation?

Sri Lanka's unique geology, combined with its abundant natural rivers, makes it ideal for hydropower generation. Resus Energy PLC operates several small hydropower and solar power stations in Sri Lanka, combining cutting-edge technology with an environmentally responsible business model to generate renewable energy.

Which energy options are being used in Sri Lanka?

The primary energy options that are being employed in Sri Lanka in the generation of electricity are hydro power, Coal power and fossil fuel based thermal power such as gas turbines, steam turbines, combined cycle plants and diesel engines.

What is the demand for electrical power in Sri Lanka?

The demand for electrical power in Sri Lanka has been growing at an average annual rate of about 7% over the last two decades.
