# Cote d Ivoire BESS lithium battery pack

## Overview

---

Will a lithium-ion battery energy storage system be installed in Côte d'Ivoire?

A lithium-ion battery energy storage system (BESS) made by Saft will be installed at a 37.5MWp solar PV power plant in Côte d'Ivoire (Ivory Coast). It is the African country's first-ever large-scale solar project and the batteries will be used to smooth and integrate the variable output of the PV modules for export to the local electricity grid.

Are lithium-ion batteries good for Bess?

Although certain battery types, such as lithium-ion, are renowned for their durability and efficiency, others, such as lead-acid batteries, have a reduced lifespan, especially when subjected to frequent deep cycling. This variability in endurance can pose challenges in terms of long-term reliability and performance in BESS. 4.

How much does Bess cost?

As of 2024, the price range for residential BESS is typically between R9,500 and R19,000 per kilowatt-hour (kWh). However, the cost per kWh can be more economical for larger installations, benefitting from the economies of scale.
