Cylindrical 12v lithium battery

Overview

What is a cylindrical lithium ion battery?

Cylindrical lithium-ion battery cells are a type of rechargeable battery commonly used in a wide range of electronic devices, electric vehicles, and energy storage systems. They are characterized by their cylindrical shape, standardized sizes, and high energy density, making them versatile and suitable for various applications.

What is a 12V lithium ion battery?

A 12V lithium ion battery, also known as a 12V lithium polymer battery, has a nominal voltage of 12V and is widely used in digital products, power tools, special wearable devices, etc. The price of a 12V lithium battery mainly comprises of the cell, PCM, and case.

What is a 12V Lithium polymer battery?

A 12V Lithium polymer battery is a type of battery. It has large current and capacity capabilities. Lithium polymer batteries capable of high power discharge need to control the current within the product specifications. If it's not urgent, it can be charged with 0.2C, and the current generally cannot exceed 1C.

What is a cylinder type lithium ion secondary battery?

Cylindrical Type Lithium Ion Secondary Batteries are packaged in metal cans. These batteries can be used at high rate and maintain high capacity. If you cannot find the model number, post to the Contact Form.

How do you identify a cylindrical lithium-ion battery?

For instance, "65" represents a height of 65mm. Fifth Digit: The fifth digit indicates the cylindrical shape of the cell. Typically, it's "0" for cylindrical cells. By following this naming convention, we can easily identify the size and shape of cylindrical lithium-ion battery cells.

What is a lithium-ion power brick battery?

The Lithium-Ion PowerBrick battery 12V-12Ah offers high level of safety through the use of cylindrical cells in Lithium Ferro Phosphate technology (LiFePO₄ or LFP). PowerBrick 12V-12Ah integrates an innovative Battery Management System (BMS) in its casing to ensure a very high level of safety in use.
