DC uninterruptible power supply for fire protection

Overview

Designed for 2 or 3 outputs and protected from overload and short circuit, it provides fault indication and eliminates the deep discharge of batteries - Temperature compensated charging - Input: one single phase (115-230-277 Vac) - Output: 12-24-48 VDC - Temperature compensation - Deep discharge protections - IUoUO charging curve, constant voltage and constant current Battery-Life Test function (Battery Care) - Four charging modes: Recovery, Boost, Absorption, Float - Protected against short circuit and reverse polarity - Output signal (contact-free) for discharged or damaged battery, Modbus, main and back-up - Combinable with DC UPS series - Wall mounted - Protection degree: IP30 - Complies with EN54-4

What is a DC uninterruptible power supply?

This power supply is supplied by mains voltage and contains an integrated DC uninterruptible power supply feed by an external battery. It is designed to supply the applied load continuously and without interruption, even when the mains power fails.

What is an uninterruptible power supply (UPS)?

The uninterruptible power supply (UPS) for sensitive or safety-related 24VDC systems supplied from the AC mains is particularly important in the event of blackouts, voltage fluctuations or flicker. In an emergency, it is important to avoid dangerous system failures, loss of productivity or data.

What is a resipower power supply?

In line with the BS 9251:2021 standard, Dutypoint has developed a NEW enhanced power supply solution. The NEW ResiPOWER provides an uninterruptible power supply with additional battery banks, designed specifically for fire sprinkler systems. Sprinkler-proof protection for the ResiPOWER ® range of UPS and battery bank systems.

How does a DC-UPS battery management system work?

This power supply provides an integrated professional battery management

system to charge and monitor an external lead-acid battery. The result is a complete DC-UPS system in a compact housing with no additional parts needed. The external connected 12 V battery will be charged and held in charged mode by the power supply.

What is a DC-UPS with external batteries?

The DC-UPS with external VRLA batteries feature the PULS' 1-Battery-Concept: This means each battery is individually charged and monitored, which avoids the need for matched batteries and ensures longest battery life. What is a UPS module?

UPS is the short version of "uninterruptible power supply".

Do you need a backup power supply for a sprinkler system?

A three-phase online UPS system. A packaged fire pump set for higher flow residential sprinkler systems. One of the key updates in the 2021 version of BS 9251 (The standard for residential and domestic fire sprinkler systems) is the concept of 'enhanced supply', which stipulates the need for a backup power supply for the sprinkler pump system.

DC uninterruptible power supply for fire protection

Wall Mounting DC-UPS Compliant with EN54-4 Fire Detection & Fire ...

Jun 20, 2024 · Power Supply "UPS" to support Fire & Voice Alarming System - Model SFP544 The advanced Uninterruptible Power Supply for alarm system EN54-4 Specific device for ...

Meanwell LAD-120D fire Alarm uninterruptible power supplies (ups)

Product Name:Meanwell LAD-120D fire Alarm uninterruptible power supplies (ups);Built-in battery charger:and UPS function;Forced UPS mode:for battery maintenance;High efficiency:up to ...

Adel DC-UPS Fire & Voice Alarming System

The advanced Uninterruptible Power Supply for alarm system EN54-4. Specific device for application in fire-protection systems. Designed for 2 or 3 outputs and protected from overload ...

UPS systems ensure greater reliability in critical

...

Jan 29, 2025 · Requirements for power supply systems in critical infrastructures
In this blog article, we examine the requirements for power supplies and DC
