**Does the container have a
generator**

Overview

What is a genset in a reefer container?

What is a genset?

A genset, short for generator set, is a power unit. It can be attached to a reefer container and provides the container with electricity. A reefer container does not cool itself and therefore a generator set is necessary, to provide it with electricity all over the world.

Do reefer containers need a generator set?

A reefer container does not cool itself and therefore a generator set is necessary, to provide it with electricity all over the world. These containers are used for international transport (or storage) and often contain goods like medicines that must remain at a certain temperature. How does a container genset work?

.

Do you need a commercial generator for a shipping container?

When your company's future, your patients' wellbeing, and the perishable goods in your inventory are all on the line then you can't risk a power outage. A commercial generator for your 20ft or 40ft refrigerated shipping container will give you the protection and peace of mind you need. But how do you know which one to pick?

.

What is a genset container?

They are more permanently attached compared to clip-on Gensets and are typically used when the container is expected to remain on the same transport method for a longer period, such as an extended trucking journey.

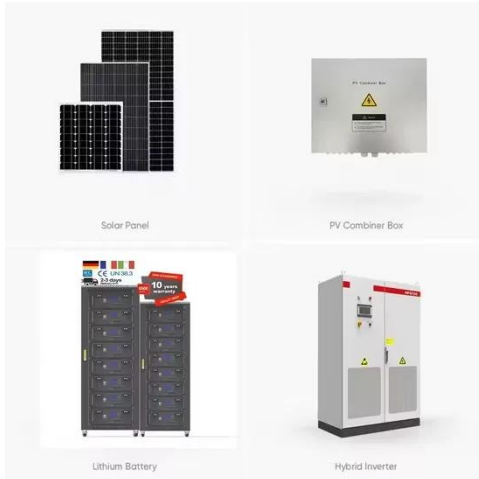

What are the different types of container generators?

We can supply the 20' container, 40' container, and widen or heighten container type. They are divided into the normal type and silent type. This series generator set can be easily moved to the desired location, can run under the most demanding working conditions.

How to choose a generator for a refrigerated shipping container?

Diesel, gasoline, and natural gas are good options. Generators can be really loud, so picking one with a low noise level is key. This is even more important if the generator is going to be used in your neighborhood. If you need to move your refrigerated shipping container around, it's best to go for a generator that comes with wheels.
