Overview

What is the Southeast Asia Solar supply chain map?

This edition of the Southeast Asia Solar Supply Chain Map provides a detailed snapshot of current realities and future ambitions, as the region navigates complex trade, investment, and production challenges.

Are solar panels made in Malaysia?

Most of these solar panels are manufactured for export to the US, with Malaysia's installed solar capacity at only 4.2GW. From January to September 2024, Malaysia, which is a major hub for solar panel manufacturing in South-east Asia, exported nearly US\$1.8 billion (S\$2.4 billion) worth of solar panels.

Why is PV module manufacturing under pressure in Southeast Asia?

Despite strong ambitions, PV module manufacturing in Southeast Asian is currently under pressure. Operational capacities have been significantly reduced or temporarily halted, primarily due to U.S. import tariffs. Once a strategic workaround for Chinese manufacturers aiming to access Western markets, Southeast Asia now faces growing constraints.

Who makes the most solar panels in the world?

The remaining production capacity is taken up by the US' largest solar manufacturer First Solar and South Korea's biggest solar producer Hanwha Qcells. Most of these solar panels are manufactured for export to the US, with Malaysia's installed solar capacity at only 4.2GW.

What's new in the 2025 Southeast Asia Solar supply chain map?

The first 2025 edition of the Southeast Asia Solar Supply Chain Map includes significant revisions and additions, driven by valuable market feedback and the region's evolving geopolitical and industrial dynamics.

Are other countries blooming with solar power?

It is not nearly as immediately apparent that other countries in Asia are also blooming with solar power. Given the recent commitments at COP21 and ASEAN Ministerial summits, positive investment climate and huge hunger for power, Asia has witnessed the commissioning of an abundance of utility-scale solar plants.
