Electric impact rammer lithium battery pack

Overview

How long does a battery rammer take to charge?

Operation with a durable battery makes completely emission-free work possible. The battery takes 80 minutes to charge and has a run time of 30 minutes per charge. You will need to select the size of the foot required. Discover the emission-free Battery Rammer from GAP Hire Solutions - the National Hire Partner.

What is a rammer & how does it work?

The rammer provides no gas headaches with push button start and no engine to maintain, reducing downtime and allowing you to get jobs done faster. No gas engine means fewer wearable parts, less noise and vibration, and zero emissions mean a safer workplace indoors and in trenches.

Which rammer is best?

Our MX FUEL™ 70 kg Rammer is the most productive and easiest to use. The POWERSTATE™ Brushless Motor delivers the power to hit harder and travel faster for maximum productivity without sacrificing compaction performance.

What is a vibratory rammer?

The vibratory rammer AS50e for hire from GAP is one of the world's first two battery-powered rammers. In addition to traditional application areas, it is specifically suited for the compaction of pipe gussets and very narrow trench applications. Operation with a durable battery makes completely emission-free work possible.

Why should you choose multiquip rammers?

Multiquip has built a reputation on providing the most innovative, lowest maintenance and most productive rammers in the business. High performance and unparalleled reliability have made Multiquip's Mikasa Rammers the #1 choice in the equipment rental industry and the standard among contractors

everywhere. Tough Tools for Every Job.

What if my rammer is lost or stolen?

If your rammer is ever lost or stolen, you can prevent tampering with remote lockout capability. The MILWAUKEE® MX FUEL™ 70 kg Rammer is fully compatible with ONE-KEY™ and our MX FUEL™ Equipment System. Select to rate the item with 1 star. This action will open submission form.
