## Overview

---

An FAQ overview of US installation codes and standard requirements for ESS, including the 2026 edition of NFPA 855 and updates to UL 9540A. What are the requirements for energy storage systems?

Energy storage systems shall be installed in accordance with NFPA 70. Inverters shall be listed and labeled in accordance with UL 1741 or provided as part of the UL 9540 listing. Systems connected to the utility grid shall use inverters listed for utility interaction.

What are the requirements for chemical storage cabinets?

There are some general requirements for chemical storage cabinets that can assist in the safe storage of chemicals indoors. A chemical storage cabinet for flammable liquids, flammable solids, oxidising agents, organic peroxides and toxic substances must have: Self-closing, close-fitting doors.

Which ul 9540a test method is required for ESS installation?

The current and next edition of NFPA 855 specify that UL 9540A is the required test method for ESS installation. In certain instances, ESS installations may require additional large-scale testing. Organizations may turn to alternative test methods for large-scale testing.

Do ESS installations require additional large-scale testing?

In certain instances, ESS installations may require additional large-scale testing. Organizations may turn to alternative test methods for large-scale testing. However, these test methods are not widely accepted and should be considered on a case-by-case basis.
