Energy storage equipment design in Gothenburg Sweden

Overview

How is Gothenburg shaping the new battery industry?

In Gothenburg we are shaping the new battery industry. In the coming years Gothenburg and West Sweden will have in place two battery gigafactories, with major investments being made by public and private actors, including Volvo Cars and the Volvo Group. The region is set to become an important hub for both battery development and production.

How is Gothenburg reskilling the battery industry?

Reskilling and upskilling initiatives for the region's new battery industry are also underway. Among them is a unique education and training centre which has opened in Gothenburg, specifically for the battery value chain. Around 7,000 people will be trained in state-of-the-art facilities between 2024 and 2029.

What is the Swedish electromobility centre?

Together with industry partners it carries out leading research on, for example, battery materials, energy storage and battery manufacturing. It also hosts the Swedish Electromobility Centre, a national centre of excellence for hybrid and electric vehicle and charging technology.

Are flow batteries available in Sweden?

Flow batteries are used today in the form of stationary energy storage and are established on the market in many parts of the world, but not yet in Sweden.

Why is Gothenburg a hub for R&D?

As a hub for R&D, Gothenburg offers excellent possibilities for testing and many platforms for collaboration. For example, the largest of three facilities for SEEL Swedish Electric Transport Laboratory, Sweden's testbed for electromobility, is located in Gothenburg.

Where will Sweden's first organic flow battery be installed?

Rivus Batteries and Bengt Dahlgren will install Sweden's first organic flow battery in pilot-scale at HSB Living Lab in Gothenburg.
