French Lyon Steel Energy Storage Battery

Overview

Is totalenergies the biggest battery storage project in France?

The energy major has 103MW of capacity market contracted energy storage online or coming online in France. Interestingly however, despite presiding over the single biggest project in the country, TotalEnergies sits second in Clean Horizon's chart of France's most prolific (publicly announced) battery storage project owners and developers.

Where is France's largest battery energy storage system located?

Energy-Storage.news reported a while back on the completion of an expansion at continental France's largest battery energy storage system (BESS) project. BESS capacity at the TotalEnergies refinery site in Dunkirk, northern France, is now 61MW/61MWh over two phases, with the most recent 36MW/36MWh addition completed shortly before the end of 2021.

Will 900MW of battery storage be online in France?

Image: TotalEnergies. Close to 900MW of publicly announced battery storage projects will be online in continental France by the end of next year and although the country lags behind its nearest northern neighbour, the business case for battery storage is growing.

What is Envision Energy's first independent battery energy storage contract in France?

After previous triumphs in Europe, this project represents Envision Energy's first independent battery energy storage contract in France. Envision Energy will provide a minimum of a 14-year long-term maintenance (LTSA) agreement, starting construction in June 2025, ensuring ongoing presence in the area once the construction phase is complete.

What is the Cernay-lès-Reims battery project?

Fully developed and managed by TagEnergy, the Cernay-lès-Reims battery

project benefits from significant economies of scale, with a storage capacity nearly five times larger than the country's current largest operational battery.

Does the UK have a large-scale battery storage market?

As shown by the work of our colleagues at Solar Media Market Research, the UK has roughly 1.5GW of large-scale battery storage. Its market has grown rapidly: before a 200MW tender for grid services held by transmission system operator (TSO) National Grid in 2016, the UK had almost nothing.
