Greece 400MW energy storage project

Overview

The Regulatory Authority for Energy (RAE) in Greece has launched an auction for grants towards 400MW of energy storage, with three weeks to submit project proposals. How many projects have been awarded in Greece's first battery energy storage system?

The Greek Regulatory Authority for Energy has confirmed that 411.8 MW of projects have been awarded in the country's first standalone battery energy storage system (BESS) tender, which has attracted huge interest among developers. Investment and operating aid will be granted to 12 projects put forward by seven proponents.

How many mw can a company invest in energy storage in Greece?

The Regulatory Authority for Energy, Waste and Water (RAAEY) completed the selection process in the first energy storage auction in Greece. According to the terms of the auction, each participant could apply with a maximum of 100 MW. Three companies divided it into separate investments.

Will Greece allocate 1 GW of new energy storage capacity?

RAAEY – Greece's newly formed regulatory authority for waste, energy, and water – has revealed that the country will allocate 1 GW of new energy storage capacity. The program consists of three separate auctions, with capacities of 400 MW, 300 MW, and 300 MW.

What is Greece's energy storage program?

Greece's energy storage program will draw €341 million (\$372.3 million) from the European Union's post-pandemic recovery fund, which was approved last year by the European Commission. The program's first and second tenders will focus on standalone energy storage projects connected to the Greek electricity transmission network.

How does Greece support energy storage projects?

Greece's subsidy support for winning energy storage projects in the upcoming tenders is generous. During the construction phase, all winning projects will receive a one-time payment of €200,000 per MW, which serves as a capital expenditure subsidy.

How much does energy storage cost in Greece?

For the first energy storage auction, the regulator has set a capped CfD price of €115,000 per MW per year. As a result, winning projects must participate in the energy market, such as Greece's wholesale electricity trading and secondary balancing services market. Each year, the government will assess the projects' market earnings.
