

SolarTech Power Solutions

Guyana s Transfrontier Solar Power System

Overview

How is solar energy used in Guyana?

In Guyana, solar energy is used for several purposes, including drying agricultural produce, irrigation, ICT, and to improve electricity access in rural areas. Under the Hinterland Electrification Programme, in excess of 19,000 solar PV systems had been installed in nearly 200 communities by 2018.

How many solar PV farms will Guyana have?

The main electric utility, Guyana Power and Light Inc. (GPL) is preparing plans for 3 utility scale solar PV farms totaling 30 MW for the national grid in the long term, as well as 0.75 MW Solar PV Farm at Wakenaam and a 4 MW Solar PV Farm at Onverwagt in the near future.

Is Guyana a good place to install solar PV?

As a result, most locations across Guyana have excellent solar insolation levels and are ideal for solar PV generation. As at 2018, the total installed capacity for Solar PV in Guyana is 4.63 MW with an estimated annual generation of 7.16 GWh.

How many solar panels will be installed in Guyana in 2019?

In addition, 1.184 MW of solar PV systems will be installed at 80 public buildings in all 10 Administrative Regions of Guyana in 2019. These installations will result in estimated savings of G\$114 million and avoiding 1,415 tons of CO₂ emissions per year.

What is Guyana's main source of energy?

Guyana is currently dependent on imported petroleum-based fuels as its main source of energy.

Is the energy sector poised for significant transformation?

However, the Energy sector is poised for significant transformation due to Guyana re-committing itself to the development of its indigenous renewable energy resources and to pursue 100% renewable energy in electricity generation in its Green State Development Strategy.

Guyana s Transfrontier Solar Power System

Guyana installs 4.8 MW of home solar systems

Jul 14, 2025 · Guyana's Solar Photovoltaic Home Energy Systems project has added 4.8 MW of installed capacity across ten administrative regions since its inception in July 2023.

New Solar Farm Sets Pace in Guyana's Transitions to Green-Power

Jul 3, 2025 · The goal: a stable, sustainable, and inclusive energy future powered by a balanced mix of solar, hydro, gas, and wind. A Smarter, Greener Grid Kesh Nandlall, Leader of ...

Guyana Advances with Solar PV Installations - ...

Oct 4, 2017 · He further added that "the project will also seek to demonstrate the applicability of photovoltaic system operation and its energy contribution in ...

Guyana solar investment: 21 Villages to Receive GYD 885M in Solar Power

Jun 8, 2025 · Furthermore, GPL's bid for a 15 MWp Solar PV System in Linden illustrates Guyana's commitment to expanding its solar capacity, aiming to power thousands of ...

Linden to lead Guyana's clean energy transition ...

May 22, 2025 · In a major leap towards a sustainable energy future, the town of Linden is set to become the national leader in renewable energy development ...

Guyana to install 33 MWp of Grid-scale Solar PV ...

Oct 7, 2022 · The program is targeting eight projects totalling 33 MWp of solar PV in three of the country's grids (Guyana has several un-interconnected grids) as ...

New Solar Farm Sets Pace in Guyana's Transitions to

Green-Power

Jul 3, 2025 · With a peak capacity of 750 kilowatts (kWp), the facility integrates advanced photovoltaic modules, intelligent inverters, and robust battery storage. This hybrid system ...

The solar alternative for Guyana

Nov 1, 2021 · Of all the energy possibilities, solar power is now the best for Guyana. It is the least expensive, will put power in the hands of the ordinary man, and is blindingly simple.

Guyana to pump \$791.4M into key renewable energy initiatives

Feb 21, 2025 · It follows a \$7.9 billion investment in renewable energy initiatives from 2020 to 2024, which included solar farms, hydro projects, and the distribution of over 30,000 solar PV ...

Guyana's Oil Revenues Finance Energy Transition

May 2, 2025 · While Guyana's oil revenues broaden opportunities to quicken the transition, companies in the sector prioritize sustainability. Rafael Fumis, Country Manager of MODEC ...

STIMULATING FUTURE GROWTH: CLEAN ENERGY - Guyana Energy ...

Guyana has some of the highest electricity rates in the Americas and is about 97% dependent on imported fossil fuels. Using natural gas as a bridge away from heavy fuel oil, followed by the ...

Guyana's hinterland transformation...High-speed ...

Aug 21, 2024 · Phillips reported that the government has made significant strides in bridging the digital divide and enhancing energy access through solar ...

Guyana solar energy capacity: Impressive 39 MW Expansion ...

**200kWh
Battery Cluster**

Aug 17, 2025 · Guyana is significantly expanding its solar energy capacity, with plans to boost its installed capacity to over 39 megawatts by 2025. The government (source)

Clean energy, brighter futures: LCDS brings solar power to ...

Jul 18, 2025 · Residents of Chenapou in Region Eight are learning how to operate the PV systems With the rollout of the government's 30,000 Solar Photovoltaic (PV) Home Energy ...

Guyana hitting major milestones with solar power projects - ...

Even as Guyanese authorities accelerate oil production offshore, strategic steps are being taken to diversify the nation's energy mix. According to the Head of the Guyana Energy Agency ...
