High quality China high voltage switchgear manufacturer

Overview

Who is China high voltage switchgear manufacturer and supplier?

KDM is one of the leading China High Voltage Switchgear manufacturers and Suppliers. We offered a full range of main products in order to meet various customers' requirements. High voltage switchgear such as control boxes, insulators, and others. All our products meet and exceed the main testing.

What is a high voltage switchgear?

Our high voltage switchgear is made with high quality materials and components to ensure its long service life and reliability. DOHO HV switchgear products are designed for installation in locations with high voltage systems such power transmission and distribution.

What types of switchgear do you offer?

We offer a broad range of switchgear products, including low voltage, medium voltage switchgear, and high voltage switchgear. We also offer a wide variety of components in all switchgear categories, such as circuit breakers, fuses and an array of switches.

What is outdoor-type high voltage switchgear?

Our Outdoor-type High Voltage Switchgear offers outstanding reliability, mechanical robustness, and a long-lasting electrical life span. This is the perfect solution for all your electrical network needs. Require limited maintenance and cost-efficient outdoor-type high voltage switchgear attainable in KDM. 10 Products Found.

What is gas insulated high voltage switchgear?

Gas Insulated High Voltage switchgear. It is a type of high voltage switchgear that uses superior dielectric gas (SF6) as the main insulating material for conductive elements within the switchgear. How does Gas Insulated High Voltage Switchgear compare to Air Insulated High Voltage Switchgear?

.

What are the different types of high voltage switchgear?

Air Insulated High Voltage Switchgear. This type uses air as the main insulating material for conductive components in the switchgear. Gas Insulated High Voltage switchgear. It is a type of high voltage switchgear that uses superior dielectric gas (SF6) as the main insulating material for conductive elements within the switchgear.
