Solar roof tiles offer a new way to capture solar energy on roofs. We explore some of its characteristics, advantages, and disadvantages.

Which solar tiles are right for Your House?

GB-SOL solar tiles – Located in Pontypridd, Wales, GB-SOL solar tiles are lighter than traditional tiles, at 3.5kg per slate, which means you could replace your roof without having to strengthen your property's structure. Solecco Solar – Solecco Solar offers tiles in eight different colours, from smooth grey to terracotta and old English dark red.

What is the difference between solar tiles and photovoltaic panels?

Solar tiles operate identically to the photovoltaic panels that are already widely used in construction. The primary difference between them lies in their assembly: whereas photovoltaic panels are attached to an existing roof, solar tiles are part of the roof's construction from the start, taking the place of regular tiling.

How do solar tiles work?

Solar tiles operate identically to the photovoltaic panels that are already widely used in construction.

What types of solar tiles do edilians make?

Edilians solar tiles – Edilians make two types of solar tiles, Solar Max and HP 10 Solar. The Solar Max have an aluminium casing and are larger, fitting two per square metre, while the HP 10 have a clay support and fit five per square metre. Both are available in slate or red colours.
