Overview

Should you buy or sell a base transceiver station?

For savings of up to 70% off original OEM pricing, buy used base transceiver stations and build out the right support for your base station controller. When you're ready to expand beyond current network and displace existing technologies, sell your used transceiver station as a way to shore up investment in top-line RBS and eNB.

What is a base transceiver station?

Networks rely on base transceiver stations to ensure reliable communication between the consumer and the network itself, making them the lifeblood of any wireless operator. With support for GSM, CDMA, Wi-Fi, WiMAX, LTE, wireless local loop and WAN technologies, they're an integral part of any base station subsystem.

Where can I buy used wireless base stations?

Worldwide Supply offers a variety of OEM branded used wireless base stations to fit your unique network configuration. As you expand into new markets and adopt newer technologies, turn to Worldwide Supply to sell your wireless base stations and generate a maximum return. We work hard to be your best location to buy wireless base stations.

Are solar base stations economically interesting?

Based on eight scenarios where realistic costs of solar panels, batteries, and inverters were considered, we first found that solar base stations are currently not economically interesting for cellular operators. We next studied the impact of a significant and progressive carbon tax on reducing greenhouse gas emissions (GHG).

How to estimate the cost of building and operating a cellular network?

A simple method for estimating the costs of building and operating a cellular

mobile network is proposed. Using the empirical data from a third generation mobile system (WCDMA), it is shown that the cost is driven by different factors depending on the characteristics of the base stations deployed.
