How much does it cost to maintain a wind power station in Phnom Penh

Overview

Wind power operating costs average \$40/kW-year, or 1-2c/kWh. \$25/kW is maintenance cost. The wind maintenance market is worth >\$20bn per year. How much does it cost to maintain a wind turbine?

Maintaining a wind turbine is an important part of ensuring that it operates at maximum efficiency throughout its lifespan. While the cost of maintenance can vary depending on several factors, it is typically around 1-3% of the initial capital cost of the turbine per year.

How much does offshore wind turbine maintenance cost?

Offshore turbine maintenance is costly and logistically complex, requiring specialized vessels and careful coordination. That's why, according to the U.S. Department of Energy, offshore wind O&M costs were 22.15 cents per kWh, while land-based turbines came in at just 8.66 cents per kWh.

How much is the wind turbine maintenance market worth?

We estimate that around \$25/kW of our cost build-up can be described as 'maintenance'. Hence across 825GW of global wind capacity (at the end of 2021), the wind turbine maintenance market would be worth >\$20bn per year. This maintenance 'after-market' is typically controlled by wind turbine manufacturers.

How much does a commercial wind turbine cost?

How much do commercial wind turbines cost?

A utility-scale wind turbine costs between \$1.3 million to \$2.2 million per MW of installed nameplate capacity. Most commercial-scale turbines installed nowadays are 2 MW in capacity and cost between \$3 and \$4 million to install.
