Huawei cylindrical lithium battery automatic

Overview

What is Huawei's new lithium-ion battery technology?

Read more Back in 2019, Huawei filed a patent registration for its new method with the innovation name “a hard carbon anode material, lithium-ion battery and its preparation method and application.

Will Huawei patent a lithium-ion battery with graphene material?

Previously, Huawei also patented for lithium-ion battery with graphene material that could increase durability and performance. However, there's no confirmation when and what Huawei is planning with these patents. Read more.

What is a lithium ion battery?

The lithium-ion battery prepared as a negative electrode material has the high first reversible capacity, high first coulombic efficiency, stable properties, and consistent batches Good sex. Previously, Huawei also patented for lithium-ion battery with graphene material that could increase durability and performance.

What is a smart lithium battery?

The SmartLi provides lithium battery cell short-circuit detection and alarm functions to ensure the safe operation of lithium batteries. High energy density reduces the footprint compared with lead-acid batteries. The intelligent BMS reduces routine O&M costs.

How many cycles can a lithium battery last?

When multiple cabinets are connected in parallel, only the master cabinet has an LCD. The cycle life is long and can reach 5000 cycles (cell: 25°C, 0.5C charge/1C discharge, 50% DOD, 5000 cycles at 70% EOL). The three-layer battery management system (BMS) ensures the reliability of lithium batteries. A built-in fire extinguisher is used.
