

## SolarTech Power Solutions

# Hungary makes energy storage cabinets

## Overview

---

Where will Hungary's largest energy storage system be built?

With funds obtained through a previous program, transmission system operator MAVIR is already building the country's largest energy storage system – a 20 MW project in Szolnok, central Hungary, the ministry said. It added that several projects with even bigger capacity will be installed under the tender concluded a few days ago.

Who will build Hungary's largest energy storage facility in Szolnok?

Forest Vill Ltd. will build Hungary's largest energy storage facility in Szolnok on behalf of MAVIR Ltd. The Budaörs-based company will design and fully implement a 20 megawatt energy storage facility with a capacity of 60 megawatt-hours as part of the HUF 8.5 billion project.

Will Hungary's new battery energy storage system help Green the grid?

The new facility supports a growing push to green Hungary's power grid. Hungary has just switched on its largest battery energy storage system (BESS) to date, stepping up its role in Central Europe's growing grid-scale energy transition.

Will Hungarian energy storage projects get subsidy support?

The Hungarian Ministry of Energy has announced that around 50 grid-scale energy storage projects with a cumulative capacity of 440 MW have received subsidy support through a tender launched in February this year.

Is Hungary stocking up on battery backup?

Hungary isn't alone in stocking up on battery backup as it charts its green energy path. In neighbouring Bulgaria, a massive 124 MW/496 MWh battery energy storage system went live in Lovech earlier this year.

How much solar capacity does Hungary need?

Hungary has set a target of 12 GW of solar capacity by the start of the next decade. However, grid capacity shortfalls have been dire, hampering primarily the rollout of large-scale solar. The country's revised National Energy and Climate Plan envisages the construction of a total of 1 GW of storage capacity by 2030.
