Our mission is to ensure that new generations do not have to worry about pollution. Our goal is to achieve the highest quality . Combine the HEMK with our MV stations. Utility scale solar stations. .

What is a solar inverter?

A solar inverter is a device that converts the direct current (DC) from your solar panels into alternating current (AC) that you can use or sell to the grid. There are different types of solar inverters depending on your needs and preferences. At Power Gardens, you can choose and buy any type of inverter that suits your needs.

What types of inverters can you buy at power gardens?

At Power Gardens, you can choose and buy any type of inverter that suits your needs. Here are the main types of inverters and their benefits: Grid-Tie Inverters: These are the most common and simple type of inverters. They

connect your solar panels to the grid and allow you to sell your excess power to the utility company.

What is a microinverter solar system?

Typically, microinverters are “distributed” inverters. Solar PV systems with microinverters have a small inverter installed for each individual solar panel. Instead of sending energy from every panel to a single inverter, microinverters convert the DC energy to AC energy on the roof itself.
