Is the 5G base station in the Democratic Republic of Congo a communication or a hybrid energy source

Overview

Will Vodacom boost connectivity across DRC?

With Vodacom, Orange is hoping to boost connectivity across DRC (Image: Orange) Both Vodacom and Orange have pledged to jointly construct up to 2,000 new solar-powered base stations over six years, using 2G and 4G technologies, in the Democratic Republic of Congo (DRC).

Is Vodacom conducting 5G tests in DRC?

(Ecofin Agency) - Khalil Al Ameriani, CEO of Vodacom DRC, announced the company is currently conducting 5G tests in the country. In a recent interview with ITWeb Africa, the manager said the trial is being carried out under the supervision of the DRC telecom regulatory authority, ARPTC.

What is orange & Vodacom doing in Africa?

Orange and Vodacom have joined hands to form, a first of its kind, rural towerco partnership in Africa. Through this partnership, the companies will collaborate to build, own, and operate solar-powered mobile base stations in underserved areas of the Democratic Republic of Congo (DRC).

What is mobile internet penetration in the DRC?

Mobile Internet penetration in the DRC is at 32.3% and Orange and Vodacom's announcement to construct new base stations in the country aligns with the country's new vision for the digital economy as included in the National Digital Plan Horizon 2025 adopted in 2019.

Is Vodacom ready to deploy ultra-high-speed internet in the DRC?

These tests aim to ensure the telecom operator's readiness for deploying ultra-high-speed internet in the DRC. Khalil Al Ameriani, however, recalled that Vodacom's primary operational goal is to continue expanding its 4G coverage across the country and 3G in specific areas.

How can the DRC bridge the digital divide?

Deploying and operating networks, particularly in deep rural areas, continues to be a significant challenge in the DRC. To bridge the digital divide and expand network coverage in underserved communities, the companies have pledged to jointly construct up to 2,000 new solar-powered base stations over six years, using 2G and 4G technologies.

 **Efficient
Higher Revenue**

 **Intelligent
Simple O&M**

 **Flexible
Abundant Configuration**

- Max. Efficiency 97.5%
- Max. PV Input Voltage 600V
- 150% Peak Output Power
- 2 MPPT Trackers, 150% DC Input Oversizing
- Max. PV Input Current 16A, Compatible with High-Power Modules
- IP66 Protection Degree: support outdoor installation
- Smart I-V Curve Diagnosis Function: locate PV string faults accurately and automatically detect faults
- DC & AC Type II SPD: prevent lightning damage
- Battery Reverse Connection Protection
- Plug & Play: EPS Switching Under 10ms
- Compatible with Lead-Acid and Lithium Batteries
- Max. 6 units Inverters Parallel
- AFCI Function (Optional): when an arc fault is detected the inverter immediately stops operation
