Italy invests in energy storage cabinet batteries

Overview

To date - according to Polimi's data - almost all new installations concern lithium-ion batteries, a technology that is benefiting from a significant drop in costs: between 2023 and 2025, the Capex for 4-8 hour systems has been reduced by around 20%-25%, driven by the drop in raw materials, but also by growing industrial competition. How will Italy support energy storage?

Italy is one of Europe's fastest growing energy storage markets and recently introduced mechanisms to support this nascent sector. To meet its decarbonisation goals, it set out the need to build 9 GW of new grid-scale energy storage and upped its renewables targets with the aim of having 65% of electricity from green energy by 2030*.

What is the future of energy storage in Italy?

MP: The future of energy storage in Italy is bright. With investments in technology, regulatory support, and declining costs, BESS will become a key pillar of Italy's transition to a sustainable energy future. Telis Energy is proud to play a role in this journey by originating, developing, and building high-quality BESS projects.

How does Metlen support Italy's energy transition?

METLEN Energy & Metals continues to reinforce its commitment to supporting Italy's energy transition with the implementation of two new battery energy projects, which secured contracts in the Capacity Market auctions for the 2025/26 period. Specifically, METLEN has secured 15-year contracts for the development of the following projects:.

Which battery energy storage systems are awarded in the cm 2025 procedure?

25 MW, 3-hour Battery Energy Storage Systems (BESS) in the Apulia region (Erichie Storage), awarded in the CM 2025 procedure. 25 MW, 3-hour Battery Energy Storage Systems (BESS) in the Apulia region (San Severo Storage), awarded in the CM 2026 procedure.

How important are Bess in Italy's energy transition?

MP: BESS are becoming increasingly vital in Italy's energy transition. With the ambitious targets outlined in the National Energy and Climate Plan (NECP), including reducing carbon emissions and increasing renewable energy to 30% of final energy consumption by 2030, BESS are essential.

Why is battery storage a pillar of our asset diversification strategy?

Battery storage represents a pillar of our asset diversification strategy and we strongly believe the pipeline we are developing will contribute to the stabilisation of a rapidly changing grid ecosystem generated by an unprecedented penetration of renewable energy sources in the market."

Italy invests in energy storage cabinet batteries

Energy storage, how Italy secures renewables

5 days ago · Energy storage systems are a strategic asset to guarantee security and flexibility to the national electricity grid and accelerate Italy's energy transition. And they are essential to ...

Energy Storage in Italy 2025: Trends, Challenges, and the ...

Jun 29, 2020 · The Current Landscape: Pasta, Politics, and Power Grids Italy's energy mix is like a well-crafted risotto--complex but delicious. With 55% of electricity already coming from ...

Google invests in 'CO2 battery' tech in bid for 24/7 clean energy

Jul 25, 2025 · Google has made its first investment in long-duration energy storage (LDES), as it strives to meet its growing electricity needs with clean generation on a 24/7 basis. The tech ...

Italian Energy Storage Cabinet Quotation 2024: Costs, Trends ...

Mar 13, 2022 · Let's cut to the chase: storage cabinets in Italy aren't just metal boxes - they're the backbone of Europe's most exciting energy transition story. With the country aiming to install ...

Italian Power Storage Investment: The Next Big Opportunity ...

Jul 8, 2024 · CO2 Batteries: Italy's Secret Sauce in Energy Storage Move over, lithium-ion - there's a new carbonara in town. Milan-based Energy Dome [1] [4] is flipping the script with ...

Italian Power Storage Applications: A Surge Fueled by Policy ...

Jun 9, 2024 · With regions like Lombardy leading at 1,454 MWh of deployed storage, the country isn't just adopting batteries--it's rewriting Europe's energy playbook. But why should you care?
