

## SolarTech Power Solutions

# Korea Power Supply Bureau Energy Storage Battery

## Overview

---

It aims to procure 540MW of grid-connected battery energy storage system (BESS) technology to help resolve power grid shortages and control the output of power plants. Will South Korea install 540 megawatts of battery energy storage systems?

The Ministry of Trade, Industry and Energy unveiled plans for a nationwide tender to install 540 megawatts of battery energy storage systems (BESS), marking the country's first major government-led deployment of its kind. The project is part of a broader effort to modernize South Korea's power grid and support the transition to renewable energy.

Why is South Korea launching a 540mw battery energy storage tender?

South Korea is ramping up its battery energy storage deployment with a new 540MW tender to stabilize the grid and support renewable energy growth. Learn how this move strengthens both domestic resilience and global market leadership.

Does South Korea have a battery industry?

But South Korea's battery industry faces mounting pressure from China, whose manufacturers, led by CATL, currently account for nearly 90 percent of global energy storage battery capacity. CATL expanded its footprint in January by establishing a South Korean subsidiary, signaling an aggressive push into the local market.

What is Asia's largest battery energy storage system for grid stabilization?

As Asia's largest battery energy storage system for grid stabilization, it has a power output of 978 MW and a storage capacity of 889 MWh. The completion ceremony took place on September 27 at the 154 kV Bubuk Substation.

Are South Korean companies investing in energy storage systems?

Less than a decade ago, South Korean companies held over half of the global

energy storage system (ESS) market with the rushed promise of helping secure a more sustainable energy future. However, a string of ESS-related fires and a lack of infrastructure had dampened investments in this market.

Will KEPCO build another 300 MW battery energy storage system?

The utility also plans to build another 300 MW battery energy storage system by 2028. Korea Electric Power Corp. (KEPCO) has completed construction of a large battery energy storage project in Miryang, Gyeongsangnam-do Province.
