Overview

Which energy storage solutions will be the leading energy storage solution in MENA?

Electrochemical storage (batteries) will be the leading energy storage solution in MENA in the short to medium terms, led by sodium-sulfur (NaS) and lithium-ion (Li-Ion) batteries.

Which energy storage technology has the most installed capacity in MENA?

Pumped hydro storage (PHS) has the largest share of installed capacity in MENA at 55%, as compared to a global share of 90%. Pumped hydro storage is one of the oldest energy storage technologies, which explains its dominance in the global ESS market.

What is energy storage Alliance in MENA?

Create an Energy Storage Alliance in MENA supported by governments and the private sector to foster the development of ESS in the region, by enhancing public-private partnerships. A key objective of this alliance is to foster the development of ESS in the region through experience sharing and standardization.

What is an energy storage system?

An energy storage system is charged from the grid or by on-site generation to be used at a later time to take advantage of price differentials. Energy storage is used instead of upgrading the transmission network infrastructure. The storage system provides the grid with the necessary output to ensure the voltage level on the network remains steady.

Which country has the most battery storage capacity in MENA?

Currently, NaS battery technology dominates the battery storage capacity in operation in MENA, particularly in the UAE, with a total of 108 MW/648 MWh projects developed by the Abu Dhabi Water and Electricity Authority (ADWEA).

Can energy storage be integrated in MENA?

Although the energy storage market in MENA is bound to grow, several barriers exist that hinder the integration of ESS and the ramping up of investments. Financial, regulatory, and market barriers need to be addressed via policy tools that lay the foundations for an evolved power market to integrate the deployed ESS.
