Lifepo4 power station factory in Cambodia

Overview

What products does LiFePO₄ offer?

Our factory offers a comprehensive range of LiFePO₄ battery products, including battery cells, high and low voltage harnesses, battery management systems (BMS), battery shells, and more. We understand that every application has unique requirements, and we offer a high degree of customization and flexibility to cater to diverse needs.

What is a LiFePO₄ battery?

Distinguished by superior thermal stability, extended cycle life, and reduced ecological impact compared to traditional lithium-ion batteries, LiFePO₄ batteries serve as the cornerstone of UBETTER's innovative creations, uniting performance and sustainability seamlessly. Shaping an Ecologically Conscious Future with LiFePO₄ Batteries.

What does a LiFePO₄ battery engineer do?

This talented group of individuals has extensive experience in battery chemistry, materials science, and engineering. They continuously strive to push the boundaries of LiFePO₄ battery technology, conducting cutting-edge research in areas such as electrode design, cell packaging, and safety features.

Why are LiFePO₄ batteries better than other lithium ion chemistries?

They have a higher energy density, enabling longer runtimes and greater power output. They also have a longer cycle life, meaning they can be charged and discharged more times without degradation. Furthermore, LiFePO₄ batteries are inherently safer than other lithium-ion chemistries, with a lower risk of thermal runaway or combustion.

How much electricity does Cambodia have in 2022?

In 2022, Cambodia's total installed capacity amounted to 4,495 megawatts

(MW), while 1,030 MW of power was imported from Thailand, Vietnam, and Laos. The Electricity Authority of Cambodia (EAC) predicts that the total installed capacity will increase to 4,945 MW of electricity in 2023.

Does Cambodia buy electricity from neighboring countries?

In addition to local power generation, Cambodia also buys electricity from neighboring countries, especially during the dry season. In 2022, Cambodia's total installed capacity amounted to 4,495 megawatts (MW), while 1,030 MW of power was imported from Thailand, Vietnam, and Laos.
