Lithium iron phosphate outdoor power supply super fast charging

easy to install and use

World wide Products

faster charging and discharging

Multiple protection with alarm systems

Can save energy

the battery capacity can be increased freely and flexibly according to the situation of home use.

Rechargeable lithium batteries use safe LiFePO4

Overview

What is CATL 6C Super-chargeable lithium iron phosphate battery?

CATL 6C super-chargeable lithium iron phosphate battery has been installed on the car, and is matched with the Zunjie S800. It is understood that the 6C high-voltage extended-range lithium iron phosphate battery pack is a product developed by CATL to meet the market's demand for efficient energy replenishment.

What is the Shenxing Superfast charging battery?

The Shenxing superfast charging battery, designed for large-scale commercial consumption, will enable an EV to travel 400km from a ten-minute charge. It is the world's first LFP battery with 4C superfast charging, meaning charging at a current of 12A above the diffusion limiting current.

What is a 4C Superfast battery?

It is the world's first LFP battery with 4C superfast charging, meaning charging at a current of 12A above the diffusion limiting current. The battery works over a wide temperature range, enabling a 0-80% charge in 30 minutes in temperatures as low as -10°C.

Will Superfast charging become a standard product for electric vehicles?

CATL's Gao Huan, CTO of its China EV business, stated: "While the superfast charging may currently be an option for high-end electric vehicles, we hope that through continuous efforts to improve technology and reduce costs Shenxing will become a standard product for every electric vehicle."

How long does a lithium ion battery take to charge?

The battery works over a wide temperature range, enabling a 0-80% charge in 30 minutes in temperatures as low as -10°C. The company has employed fully crystallised LFP cathode material to accelerate the extraction of lithium ions from the cathode by extending the range of the electronic network.
