London Foreign Trade Energy Storage

Overview

How much energy storage does the UK have?

The UK has 2.4GW/2.6GWh of operational energy storage across 161 sites, with 20.2GW additional approved in planning. The UK is deploying increasing amounts of new utility energy storage capacity each year. The total pipeline for UK energy storage is now at 61.5GW across 1,319 sites.

Who develops UK energy storage projects?

Major developers of UK energy storage projects include EDF, Pivot Power, Statera, and RES, with each company active in several power supply and flexibility markets, providing services to National Grid, Distribution Network Operators (DNOs), as well as operating in the wholesale energy markets.

Why is energy storage so important?

Energy storage is a high priority for the UK Government and a key component of the government's push towards a net zero carbon economy. The government is investing more than \$4 billion in low-carbon innovation, as the UK aims to end its contribution to climate change entirely by 2050.

Will flexible technology save the UK's energy system?

Flexible technologies like batteries will form part of the UK's smarter electricity grid, supporting the integration of more low-carbon power, heat and transport technologies, which it is estimated could save the UK energy system up to \$60 billion by 2050.

Will the UK's largest battery energy storage project get consent?

Additionally in late 2020, consent was granted for the UK's largest battery energy storage project.

How much money does the UK energy sector invest in 2022?

In 2022 the UK energy industry supported over 734,000 jobs and the entire energy sector supply chain contributed \$190bn to the UK economy. The energy sector invested \$17bn in the UK in 2022, which represented 7% of total investment. There is over \$125bn in planned investment in new energy sources over the next decade.
