# Marshall Islands double glass panels with aluminum frame

## Overview

---

What is a modular glass partition wall?

This is a revolutionary modular glass partition wall design from IQUBX where a single system is designed to accommodate multiple glazing options. This glass partition system can accommodate single glass, double glass, even 3 glasses and Vacuum Insulated Glass (VIG), also called Double Glass Unit (DGU) too.

What is tp-38 aluminum & glass partitions system?

TP-38 Aluminum & Glass Partitions System enables the installation of Sloped ceilings. A sloped wall in glass partitions refers to a design where the glass panels are installed on a slanted or angled surface, rather than being perpendicular to the floor or ceiling.

What is a double pane glass wall?

As part of the DIRT construction system, the Double Pane Glass Wall delivers without compromise. Get the look and light transmission of glass walls with improved acoustic performance for speech privacy when you need it. All with short lead times, quick installation, and the ability to easily reconfigure your layout when your space requires it.

Are aluminum frame glass walls a good choice?

Aluminum frame glass walls can meet the changing needs of a business, create the ideal space, and allow employees and clients to reap the benefits of natural light in one shot. Supported by an aluminum frame, these dependable walls are the perfect choice for a variety of applications.

What is one wall glass?

The One Wall Glass option features sleek design with 3/8 thick glass and minimal aluminum framing. This design emphasizes larger glass panels, providing greater transparency and allowing more natural light to flood the space. The result is a modern, open aesthetic that enhances the overall

ambiance of any interior.

Why should you install glass partition walls with an aluminum frame?

Natural light is known to boost productivity, create a healthier work environment, and positively impact mood. Incorporating glass partition walls with an aluminum frame welcomes natural light from exterior windows further into interior spaces than traditional walls that only act as a barrier to natural light.
