# Maximum wattage of solar energy for RV

## Overview

---

How many watts a day do RV solar panels use?

We tend to hover right around 2 kWh (2,000 watt hours) per day for two adults. When scoping out your RV solar setup, the logical place to start is with the panels. The capacity of a solar panel is measured in watts, with the advertised number of watts being the amount of power you can pull in during perfect conditions.

How much Solar do I need for my RV?

The most accurate method of determining how much solar you need is actually to monitor/measure your RV's power usage. 12V DC Power Usage For 12V DC power usage, you can install a battery monitor. It should give you accurate readouts for the amount of power you use during a day or a camping trip.

How much solar power does a travel trailer need?

An average travel trailer need 120 Amp Hours of solar power, whereas a luxury fifth wheel or Class A motorhome might need 240 to 360 Amp Hours of solar power to truly maintain its arsenal of appliances and creature comforts. So, this wide range will influence just how long it takes for you to see a full return on your initial investment.

How much solar power do you need for a camper battery?

A 300 amp-hour camper battery, for instance, would need around 300 watts of solar power. Also keep in mind that solar panels experience a 75-90% drop in efficiency on cloudy days, so it's good to have slightly more than you need when it comes to solar power (about a 20% cushion, if possible, to account for less-than-ideal conditions).

Are solar panels good for RVs?

It's become increasingly popular with campers, and especially RV travelers.

Not only is it “Green” but modern solar panels are also efficient enough to reduce or sometimes eliminate an RV’s need for a traditional gasoline or diesel-powered generator. This might leave you wondering, just how much solar power do I need to power my RV?

.

Can a small RV live on solar power?

Yet a smaller travel trailer, with modest appliances, energy-efficient LED lights, and mindful habits, might be able to live comfortably on 100 to 120 amp hours of green solar power. Aaron Richardson is an expert RVer and the co-founder of RVing Know How.
