Middle East Industrial Energy Storage Products

Overview

Which energy storage solutions will be the leading energy storage solution in MENA?

Electrochemical storage (batteries) will be the leading energy storage solution in MENA in the short to medium terms, led by sodium-sulfur (NaS) and lithium-ion (Li-Ion) batteries.

What is energy storage system deployment in MENA?

Energy Storage System deployment in MENA Energy Storage Systems (ESS) play a critical role in the integration of VRE into the power grid, as these systems manage the intermittencies of renewable energy resources and mitigate potential power supply disruptions.

Will UAE deploy 300mw/300mwh of battery energy storage capacity?

The UAE should deploy 300MW/300MWh of battery energy storage system (BESS) capacity in the next three years, according to one of its main utilities EWEC. Sungrow has signed another battery storage supply deal with renewable energy and sustainable infrastructure developer Doral for projects in Israel.

What is Enel X and Magaldi group's 13mwh thermal energy storage plant?

Enel X and Magaldi Group have begun construction on 13MWh thermal energy storage plant based on patented technology. The UAE should deploy 300MW/300MWh of battery energy storage system (BESS) capacity in the next three years, according to one of its main utilities EWEC.

Which energy storage technology has the most installed capacity in MENA?

Pumped hydro storage (PHS) has the largest share of installed capacity in MENA at 55%, as compared to a global share of 90%. Pumped hydro storage is one of the oldest energy storage technologies, which explains its dominance in the global ESS market.

Which ESS Technology is most popular in MENA?

Although PHS dominates the ESS landscape in MENA, the technology is non-modular, capital intensive, and has a lower efficiency as compared to other ESS technologies. Electrochemical energy storage, or batteries, are gaining traction in MENA, where out of the total on-grid ESS projects, 80% are of the battery type.
