# Monitoring outdoor solar lights

## Overview

---

How to maintain solar outdoor lights?

To maintain solar outdoor lights, clean the solar panel located generally on top of the light. Debris and dirt can accumulate on the solar panel's glass, which can drastically reduce the performance of the PV module and the light itself, either in intensity or working times.

What is a solar street light with CCTV camera?

The Sun Star Series Solar Street Light with CCTV Camera Solar-Get provides an integrated solar street light monitoring system with 4G solar security cameras integrated in the solar street light to ensure safe walking or movement on roads/highways or public areas.

Why do people use solar street lights?

Solar street lights are becoming more and more famous in many areas to minimize electrical load. Finally, people are also drawn to solar powered Wi-Fi cameras. Do you want to know the working principle of solar street light with monitoring equipment?

.

How does a solar lamp work?

The lamp body is equipped with a large-capacity lithium battery, which relies on the solar panel to absorb sunlight energy, and then converts it into electric energy in the battery, which is provided to the solar lamp and monitoring work.

How does a solar camera work?

The operation is very simple. Solar panels convert incoming energy from the sun during the day into electricity. Power will be stored in a battery system to provide lighting at night and power the camera during the day.
