Morocco s 5G base stations are decreasing

Overview

Is Morocco ready for a 5G network?

The Government of Morocco is currently conducting international studies to better understand international safety and implementation standards and benchmarks before deploying Morocco's 5G network. Morocco's National Telecommunications Regulatory Agency (ANRT) expects to conduct its 5G spectrum auction by the end of 2023 or beginning of 2024.

Why is Morocco lagging behind in 5G?

Morocco is one of the countries in MENA that has not launched 5G to date and is therefore lagging behind in the race to achieve the socioeconomic benefits that 5G could generate.

How will 5G impact Morocco and the MENA region?

5G has the potential to positively affect society and the economy, in Morocco and the broader MENA region (see previous section of this report). However, these benefits will be achieved only if policymakers take steps to facilitate the introduction of 5G and work to ensure its long-term success.

Could 700MHz spectrum be suitable for low-band 5G services in Morocco?

Spectrum in the 700MHz band could be suitable for low-band 5G services in Morocco. Spectrum in the 700MHz band was assigned to mobile services as a result of the adoption of the new national frequency plan in December 2017¹⁰ and appears to be free of any existing MNO allocation.

Will 5G boost economic growth in Mena in 2030?

The adoption of 5G across a range of industry sectors is expected to have further economic benefits. In a study published in February 2022²⁶, the GSMA estimated that 5G mid-band spectrum could drive an increase of USD16.0 billion in GDP in MENA in 2030 (0.35% of overall regional GDP in 2030).

When will Morocco's 5G spectrum auction start?

Morocco's National Telecommunications Regulatory Agency (ANRT) expects to conduct its 5G spectrum auction by the end of 2023 or beginning of 2024. Each telecom operator is now lining up equipment contracts in anticipation of that auction. Several international technology companies have shown interest in Morocco's evolving 5G landscape.

Morocco s 5G base stations are decreasing

Déploiement de la 5G au Maroc dès 2025 : ...

Jan 2, 2025 · Ecouter Le Maroc se prépare à franchir une nouvelle étape dans son développement technologique avec le déploiement de la 5G dès 2025.

...

Morocco to invest \$8.9B in 5G expansion by 2030

Jul 29, 2025 · Morocco has announced an ambitious national strategy to invest \$8.9 billion in extending 5G coverage to approximately 85 percent of its population by 2030. This large-scale ...

Morocco Gears Up for 5G Era: Paving the Way for Cutting ...

Among the key initiatives is the reconfiguration of the frequency spectrum and the liberation of the frequency bands that will be utilized for 5G networks. Additionally, Base Transceiver Stations ...

Ambitious 5G base station plan for 2025

The move comes as the country charted its vision for industrial growth during a two-day work conference of the Ministry of Industry and Information Technology. With 4.19 million 5G base ...

Ambitious 5G base station plan for 2025

Dec 28, 2024 · Technicians from China Mobile check a 5G base station in Tongling, Anhui province. [Photo by Guo Shining/For China Daily] China aims to build over 4.5 million 5G base ...

Accelerating spectrum availability is crucial for Morocco ...

We have identified four broad enablers that are relevant to the overall success of 5G. Spectrum availability, neutrality and affordability. 5G radio is designed to leverage a range of frequencies ...
