

SolarTech Power Solutions

Moroni monitoring UPS uninterruptible power supply

- ✓ 100KW/174KWh
- ✓ Parallel up-to 3sets
- ✓ IP Grade 54
- ✓ EMS AND BMS

Overview

Why should you use UPS monitoring software?

Uninterruptible Power Supply (UPS) monitoring plays an integral part in the functioning of an organization. Proactive UPS monitoring helps you get through a power outage without any interruptions. An effective UPS power monitoring software gives you critical insights on battery charge, and performance and sends you alerts.

What is power supply monitoring & management?

Power supply monitoring and management are essential to ensure that your network systems are operational in the event of an outage. Uninterruptible Power Supply (UPS) monitoring plays an integral part in the functioning of an organization. Proactive UPS monitoring helps you get through a power outage without any interruptions.

What does ups software do?

It controls unattended shutdowns, scheduled shutdowns, and notifications for computers powered by the UPS (Uninterruptible Power Supply). This software allows users remote access (from any network PC with a web browser) to critical power information, including battery condition, load levels, and runtime information.

What is UPS / uninterruptible power supply?

UPS or Uninterruptible Power Supply is vital protection against loss of data and costly hardware damage. It ensures that the network systems are operational when the main source of power fails. Therefore, if not monitored properly the company may put risks of downtime to their data center, server room, and other crucial equipment.

How does opmanager monitor ups?

OpManager monitors UPS using SNMP protocol which allows information about

network-connected devices to be collected in a standardized way.

How to monitor Ups & perform system graceful shutdown?

Through the network connection, the users can monitor the UPS and perform system graceful shutdown. Refer to Configuration A of the PowerMaster+ structure illustration. By installing PMCARD to the UPS, each computer powered by the UPS should be installed with “Remote”.
