Overview

Ministry of Mines and Energy National Map of Off-Grid Localities and Recommended Locations and Rollout of Energy Shops ECB EE GRN

Is solar power a good option for Namibia?

Solar power holds immense potential for Namibia. The country enjoys one of the highest levels of solar radiation in the world, with the southern regions of Namibia receiving more than 3,000 hours of sunlight annually. This makes solar energy an ideal solution for addressing Namibia's energy needs. 1. The 5 MW Solar Power Plant at Omburu.

What is Namibia's solar energy project?

This project, commissioned in 2014, was a significant milestone in Namibia's solar energy journey. The Omburu solar plant generates clean, renewable energy and contributes to reducing the country's reliance on imported electricity.

Is Namibia a good place for wind power?

While solar energy has received the most attention in Namibia's renewable energy strategy, wind power is also an increasingly important component of the country's energy mix. Namibia's coastline, which stretches over 1,500 kilometers, experiences strong and consistent winds, making it an ideal location for wind power generation. 1.

Does Namibia have a power grid?

Most un-electrified areas in Namibia are far away from the national grid and considered to have low population densities or highly dispersed settlements. Hence, it is often neither technically nor economically viable to provide access to modern energy services using the utility grid connection (Ministry of Mines and Energy 2017a).

Does Namibia need electricity?

Namibia is heavily dependent on imports for its energy supply. All fossil fuels

(coal, fuels) must be imported. Despite the small population and the low electrification rate of 56%, only about 40% of the country's electricity needs can be met from its own generation capacities.

Where will Namibia's 100 MW solar power plant be located?

In 2022, the Namibian government unveiled plans for a 100 MW solar power plant to be located at the Hardap Irrigation Scheme in southern Namibia. The project is part of the country's efforts to significantly increase its renewable energy capacity and reduce its reliance on fossil fuels.

Namibia Outdoor Power System

NAMIBIA'S NATIONAL ELECTRIFICATION POLICY

May 8, 2023 · The Namibia: Geospatial Least Cost Electrification Plan of 2021 estimates that about 50% of Namibian households had access to grid-based or MTF Tier 3 solar home ...

Revised Technical Rules: Electricity Act, 2007 Final

Jan 29, 2024 · (2) With the exception of emergency cases or forced outages, connecting licensee shall ensure reasonable notifications to the generator of outages affecting the operation and ...

OFF-GRID ELECTRIFICATION POLICY

May 8, 2023 · The Namibia Power Corporation (NamPower) is the country's state-owned power utility. It owns and operates the major power stations and the transmission grid, and is ...
